

**SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR EDITING
SUPPLIER SITE INFORMATION IN A SUPPLY CHAIN MANAGEMENT
FRAMEWORK**

5

ABSTRACT

A system, method and computer program product are disclosed for editing supplier
information in a supply chain management framework. A graphical user interface is
10 displayed that indicates a plurality of items. The selection of one of the items is allowed
utilizing the graphical user interface. In response to the selection, a supplier associated
with the item is depicted. A plurality of parameters of the supplier are also allowed to be
changed utilizing the graphical user interface.
